Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The negative limitation “not dots” does not define what the aperture is and therefore can not be ascertained by the claim language.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2851

Claims 1-11, 23 and 26-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu (GB 389,611). Shimizu teaches a method for producing a screen in which the opaque layer 4 with apertures 5 is produced by photographic means by irradiating the opaque layer through focusing elements. Shimizu does not teach 10% surface area or less. It would have been obvious at the time the invention was made for one of ordinary skill in the art at the time the invention was made to set the opaque areas to 10% surface area or less since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Claims 12-22 and 24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu (GB 389,611) in view of Dubin (U.S. Patent No. 6,278,546) or Altman (U.S. Patent No. 3,552,822). Shimizu teaches the salient features of the claimed invention except for microbeads as the focusing elements. Both Dubin (fig. 8) and Altman (fig. 1) teach that it was known to use microbeads as focusing elements. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features as taught by Dubin or Altman for the purpose of eliminating projector location dependence.
